

FLOAM

APF Topical Foam Fluoride

A fast, efficient topical fluoride
effective in one minute.

Our new and improved Floam Fluoride provides maximum coverage, maximum taste and maximum efficiency.

Floam has a light, airy consistency that stays put to provide exceptional coverage. Thousands of bubbles collapse on the tooth surface releasing fluoride - even in interproximal surfaces.

Floam clears easily and quickly from the mouth, reducing the potential for gagging and ingestion.

Floam is available in six appealing flavours that children and adults love.

Unlike heavy, viscous gels, Floam will not clog suction systems.

- Approximately 130 applications.
- Maximum coverage and full uptake in 1min.
- Cost per treatment is less than gels and creams.
- Environmentally friendly - contains no fluorocarbons.
- Six delicious flavours - Grape, Mint, Strawberry, Bubblegum, Lemon Lime, Orange Cream.
- Also available in Neutral pH - Cherry, Mint and Strawberry.

A fast, efficient fluoride treatment!

PRODUCT PROFILE

FLOAM DIN 02198703

Product	APF Topical Foam Fluoride.
Description	For topical application to aid in the protection against dental caries. FLOAM has the following composition: Sodium Fluoride Hydrofluoric Acid (equivalent to 1.23% Fluoride Ion).
Function	Floam inhibits caries formation by reducing enamel solubility and enhancing remineralization.
Packaging	Available in 125 gm aerosol containers in the following flavours: Mint, Orange Cream, Strawberry, Grape, Bubblegum, Melon and Banana Split. Provides 130 applications, based on .959 gm per usage. Also available in Neutral pH: Cherry, Mint and Strawberry.

Features	Benefits
<i>Patient Safety</i>	FLOAM fluoride concentration is identical to 1.23% APF gel, but because it is less dense, requires one-fourth as much fluoride decreasing risk of fluoride ingestion!
<i>Non-Gagging</i>	FLOAM is unlikely to overflow applicator tray thus reducing potential for gagging and ingestion.
<i>Convenient</i>	The mousse-size container, with 100+ large tray applications, is compact, easy-to-handle and easy-to-store. A simple finger touch to the nozzle distributes the foam accurately and consistently into the tray.
<i>Unsurpassed Coverage</i>	In FLOAM , fluoride is continuously supplied to the enamel as thousands of bubbles collapse on the tooth surface releasing fluoride, providing continuous coverage, especially interproximally.
<i>Patient Acceptance</i>	FLOAM's light, airy foam consistency is pleasantly flavoured with no bitter after taste. Safe for use as a 1 minute or 4 minute formula.
<i>Saves Valuable Time</i>	FLOAM clears easily and quickly from mouth and will not clog suction systems.
